## OBJECTIVE

Dedicated and results-driven B.Tech student specializing in Artificial Intelligence and Machine Learning at VIT Chennai. Skilled in Python, Java, and full-stack web development with hands-on experience in real-world AI/ML projects. Seeking opportunities to contribute technical expertise and creativity to innovative teams and challenging projects.

## EDUCATION

Vellore Institute of Technology, Chennai (2024-2028) - 8.75  
Gurukul The School, CBSE 12<sup>th</sup> (2023-2024) - 91.2%  
Gurukul The School, CBSE 10<sup>th</sup> (2021-2022) - 94.2%

## TECHNICAL SKILLS

**Languages:** Python, Java, C/C++, HTML, CSS, JavaScript | **Frameworks/Libraries:** Bootstrap, MUI, Tailwindcss, lucid-react, Full Stack Development: HTML5, CSS3, JavaScript, React, Node.js, Express.js, REST-API, Web3 and DApps  
**Tools:** Postman, Git, Docker, Visual Studio Code, Claude, Antigravity, Stitch | **Database:** PostgreSQL, MongoDB, MySQL  
**Other:** Data Structures C Algorithms, Prompt Engineering, GitHub Copilot, Cisco, Salesforce (learning)  
**Operating Systems:** Windows, Linux, VMs

## PROJECTS

### Hostel Mess Menu Planner

[Live Demo](#) | [GitHub](#)

- Built a full-stack platform to streamline weekly meal planning, voting, and feedback for students and caterers.
- Implemented granular **Row Level Security (RLS)** policies in **PostgreSQL** to secure data access across Admin, Caterer, and Student roles Role-Based Access Control (RBAC).
- Engineered a dynamic voting engine that automatically calculates winning menus and generates downloadable **PDF reports** for kitchen staff.
- Designed a responsive, UI/UX with **React** and **Tailwind CSS**, improving accessibility and user engagement

### PawShelter 🐾

[GitHub](#)

- Developed a **full-stack (PERN)** management system with **Role-Based Access Control (RBAC)** to streamline workflows for 21+ components across Admins, Staff, and Users using **REST API**.
- Engineered a complex **PostgreSQL** schema to maintain relational integrity between animal medical histories, vet assignments, and donation audit trails.
- Built an interactive analytics engine using Recharts, providing administrators with real-time SVG visualizations of donation growth and adoption metrics.
- Crafted a premium UI with **Glassmorphism** effects using **Material UI** and **Framer Motion**, featuring centralized **JWT-based security** and **Axios** interceptors for session persistence.

## ACHIEVEMENTS

- **Top Position, Ideathon 2026** - Awarded for developing an innovative AI solution.
- Completed the **Full-Stack Web Development Certification** by Angela Yu - demonstrating proficiency in HTML, CSS, JavaScript, Node.js, React, PostgreSQL, and modern Web3/DApp development
- Achieved the **Career Essentials in GitHub Professional Certificate**- validating advanced skills in GitHub workflows, project management, and automation.
- **Basic Ethical Hacking** - Completed an 8-hour course covering security fundamentals.

## PERSONAL DETAILS

- **Date of Birth:** 26 June 2006
- **Nationality:** Indian
- **Languages Known:** English, Hindi, Oriya
